Preparing an unusual surface.

Gesso (Acrylic/Emulsion paint + PVA + water)

You could add a colour to your gesso.

Remember the more water you add the more your surface will show through.

Also remember this will not make a thicker paper (more absorbent) for watercolours.

You could try backing your surface with another paper/card/ hardboard.

## 1. Bare book spread

## 2. Apply white gesso

## 3. Apply acrylic paint
